# ABOUT GENERAL ENGINEERING COMPANY

General Engineering Company is a leading manufacturer of custom-welded hydraulic cylinders. All of our premium products are engineered with CNC precision and machined to ISO 9001:2015 quality standards. Additionally, we offer expert hydraulic cylinder repair services backed by our industry-leading ISO certified quality control system.

With over 70 years of precision American manufacturing under our belts, General Engineering Company has proudly become one of the world's premier providers of custom-welded hydraulic cylinders.

## QUALITY IS DOING IT RIGHT EVERY TIME

## WHAT MAKES US DIFFERENT?

For generations we've pursued manufacturing perfection with a precise mix of quality, service, delivery and price.

Our goal is to stay on the cutting edge of technology in the manufacturing industry by providing two machine shops with some of the finest manufacturing equipment in the world. In fact, General Engineering Co. manufactures all types of hydraulic cylinders with bore sizes from 2" to 24".

If you have specific items that you need manufactured or fixed, bring them to us!

## SERVING ALL YOUR MANUFACTURING NEEDS

As a full-service machine shop, we manufacture and repair hydraulic cylinders and production parts for a wide variety of clients.

Proudly serving the mining, construction and drilling areas, General Engineering Co. has not only developed a strong reputation for exceeding industry safety standards, but also for its extensive quality assurance and control. It's the products that General Engineering Co. manufactures that meet industry standards in the most efficient and economical manner possible.
